

Breccia photos in hole S14-204. A) Rounded matrix supported breccia with both hydrothermal and siliceous intrusive matrix, 369 metres depth. B) Breccia with quartz rich hydrothermal matrix containing sulfides and brown hydrothermal biotite patches, 476 metres depth. C) Close up of intrusive matrix breccia with sulfides pyrrhotite-chalcopyrite-pyrite, 486 metres depth. D) Sulfide rich breccia matrix containing pyrite-pyrrhotite-chalcopyrite-molybdenite, 492 metres depth.
